ABOUT THE CAREERS ARE EVERYWHERE ACTIVITIES WORKBOOK

Careers are everywhere. More than just the title of this career-related elementary level activities workbook, the fact that children start the process of exploring the world of work as early as the elementary grades. With each class they take, with each life experience, they gain a greater awareness of the nature of work and begin to form ideas about their future career roles.

The activities in this workbook are intended to be fun and challenging. They have been designed around the building blocks of the elementary National Career Development Guidelines with the goal of raising career awareness. Specific objectives of the workbook include the concept of self-knowledge, the development of a basic understanding of interests, likes and dislike and how to interact with others. The various activities are also designed to raise awareness of the relationship between work and learning, the awareness of how work relates to the needs and functions of society and the interrelationships of life roles. The elementary grades are also a good time to introduce the importance of personal responsibility and good work habits and the benefits of educational achievement.

We encourage counselors and teachers to use this workbook with students and share with us any unique teaching methods or lesson plans you develop so that we might share them with your colleagues in the state.

Introduction

Awareness is the first process for students to begin exploring career possibilities. This activity book tries to help them develop Self-knowledge, Educational and Occupational Exploration, and Career Planning awareness while exploring 16 career clusters. Career Clusters are groupings of jobs that share common characteristics. By looking at clusters of jobs, a student may find a variety of careers with similar characteristics in which they may be interested. The Career Clusters shown in this activity book were developed by the US Department of Education. These clusters and associated careers and pathways can be viewed online at www.careerclusters.org.

Can You Haiku?

Haiku poems are unrhymed traditional Japanese poetry. They are very short, just 3 lines, with 17 syllables total. The first and third lines have 5 syllables, and the second line has 7 syllables. Most Haiku poems describe some detail of everyday life with a personal reaction. The poems have two sections. The poet moves from description to reflection. Try to create an image of yourself or a career with just a few words following the Haiku format. Here are 3 samples to help you get started:

Her wide open brown eyes blink;
Happy in her skin*

Numbers never stop*

Each day the doors open wide--
